

How to obtain a permanent mooring licence in Fowey Harbour

1. Contact the Harbour Office and obtain a mooring licence application form or download from the website.
2. Complete the form giving as much detail as possible about the type of boat you wish to moor. You should note that demand for deep water moorings is very high with a long waiting time. Applications for drying moorings in the upper part of the harbour are likely to be met more quickly.
3. Return the form via email to reception@foweyharbour.co.uk or to the Harbour Office.
4. Once we receive your form, your details are processed, the information checked and entered into our waiting list system. An invoice for the application fee is generated.
5. Whilst you are waiting for your mooring allocation it is essential that you keep the Harbour Office fully informed of any changes to your contact details or the boat's details.

The Allocation of Permanent Resident Moorings - How we do it

1. When a mooring is relinquished by its licensee it becomes available for re-allocation.
2. The mooring is assessed to determine what type and size of boat would be suitable. Factors influencing this decision include;
 - The size of the mooring equipment.
 - The type of mooring and available swinging space.
 - The size, type and position of neighbouring boats.
 - Past performance, i.e. what type of vessel has successfully used the mooring in the past?
3. The first person on the list with the boat type and size determined in step 2 is offered the mooring.
It should be noted that a person's position on the waiting list is determined by their application date.

Help us allocate moorings correctly. Give us as much information about your intended boat as you can. If your boating needs change whilst you are waiting for a mooring, don't forget to let us know. This way, we can ensure you are offered the right type of mooring when it becomes available.
